

## CALKiN Naked Series

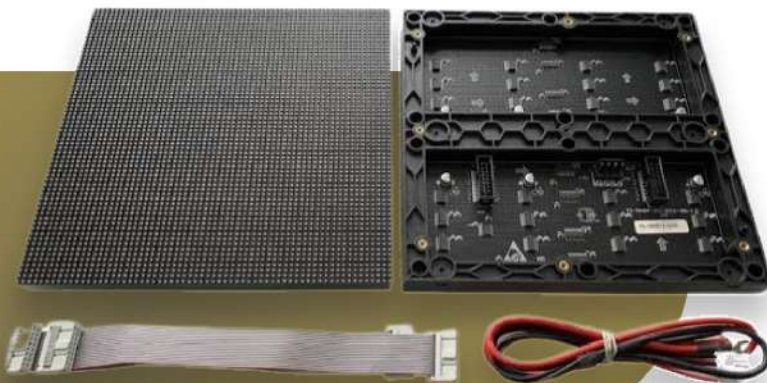

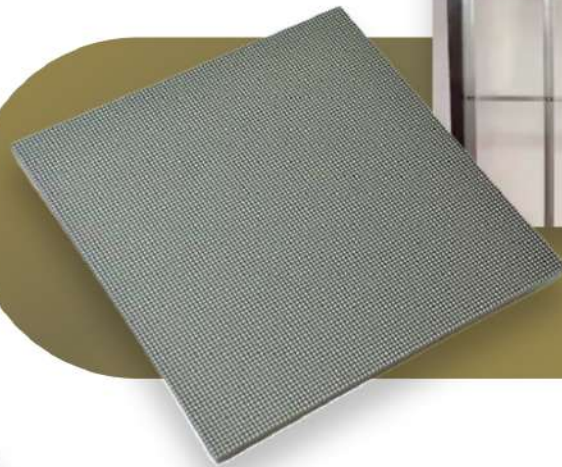

Indoor custom sizes LED 240x240 module (naked type / no cabinet)  
Budget/ Flexible/ Functional

Simple assembly / No cabinet needed / Direct embedded to metal structure

Flexible installation in any sizes and any shape with multiplication of module size (240x240)

Embedded installation can be embedded in existing dry wall structure. No cabinet installation requires

Magnetized modules, Easy front service panel replacement

High quality power supply with CE certified and industrial standard signal receiving card "Novastar"

\* Naked Series has no aluminum cabinets , as a result higher operating average temperature should be aware of. Operating the screen indoor with good ventilation is advised.

\* As no cabinet protection, the area with many rodents problems is not suitable for this type of screen
